

Handbook of Cyanobacterial Monitoring and Cyanotoxin Analysis

All Working Groups involved

WG 1 > WG 2 > WG3

WG 4

32 Chapters on cyanobacteria,
cyanotoxins, methodology, etc

29 Standard Operating
Procedures (SOPs)

3 Appendices

Est. 592 pages

112 authors

29 countries

4 years, available in Dec. 2016

1 liter blood

4 liter sweat

3 liter tears

Contents

Section I. Introduction

- 1 Introduction: cyanobacteria, cyanotoxins, their human impact and risk management

Section II. Cyanobacteria

- 2 Ecology of cyanobacteria
- 3 Picocyanobacteria – the smallest cell-size cyanobacteria
- 4 Expansion of alien and invasive cyanobacteria

Section III. Sampling, monitoring and risk management

- 5 Health and safety during sampling and in the laboratory
- 6 Basic guide to detection and monitoring of potentially toxic cyanobacteria
- 7 Case studies of environmental sampling, detection and monitoring of potentially toxic cyanobacteria
- 8 New tools for the monitoring of cyanobacteria in freshwater ecosystems
- 9 Remote sensing of cyanobacterial blooms in inland, coastal and ocean waters
- 10 The Italian system for cyanobacterial risk management in drinking water chains

Section IV. Toxins and bioactive/noxious compounds from cyanobacteria

- 11 Microcystins and nodularins
- 12 Cylindrospermopsin and congeners
- 13 Anatoxin-a, homoanatoxin-a and natural analogs
- 14 Saxitoxin and analogues
- 15 Anatoxin-a(S)
- 16 BMAA and DAB
- 17 Lipopolysaccharide (LPS) endotoxins
- 18 Cyanobacterial retinoids
- 19 Other cyanobacterial bioactive substances
- 20 Taste and odour compounds produced by cyanobacteria

Section V. Screening and trace analysis of cyanotoxins

- 21 Determination of cyanotoxins by HPLC-PDA
- 22 Determination of cyanotoxins by HPLC-FLD
- 23 Liquid chromatography – mass spectrometry
- 24 Capillary electrophoresis of cyanobacterial toxins
- 25 Immunoassays and other antibody applications
- 26 Protein phosphatase inhibition assays
- 27 Bioassay use in the field of toxic cyanobacteria
- 28 Molecular tools for the detection of toxigenic cyanobacteria in natural ecosystems

Section VI. Methodological considerations

- 29 Method validation guidelines for the analysis of cyanotoxins
- 30 Interpretation, significance and reporting of results
- 31 Lessons from the Užice case: how to complement analytical data
- 32 Selection of analytical methodology for cyanotoxin analysis

Section VII. Standard Operating Procedures (SOPs)

- 29 different on cyanobacterial enumeration, pigment analyses, screening and trace analyses of cyanotoxins and taste/odour compounds, validation

Section VIII. Appendices

- Appendix 1 Cyanobacterial species and recent synonyms
- Appendix 2 Cyanobacteria associated with the production of cyanotoxins
- Appendix 3 Tables of microcystins and nodularins
